MANAGEMENT

be Flexible + **be** Safe + **bi-Cube**[®]

bi-Cube[®] *Boutique* for IT - Services

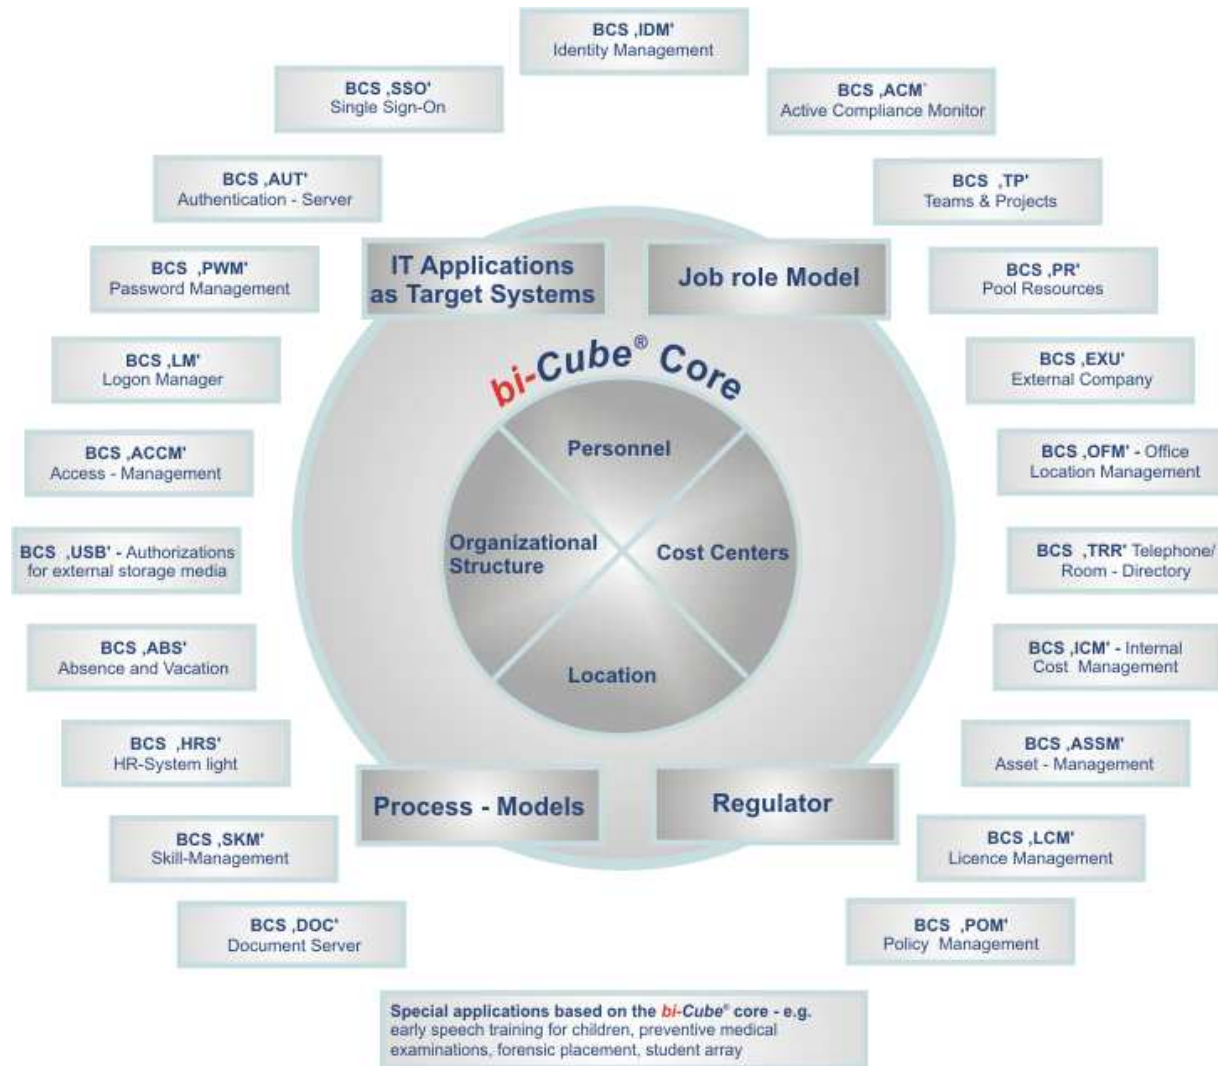

as SaaS Solution by Cloud

SaaS Solution – Cloud-Computing

- Cloud-Computing experiences a huge boom due to rising pressure on business costs within Companies
- Cloud Computing may help to reduce IT costs by dynamical scaleable IT recourses
- **bi-Cube[®] Boutique** offers **IT-Services** on the **Business Layer**
- As in a Boutique the user may choose his services out of a selection and if required complement or deselect components
- The user saves on technical and partly functional support for the services

bi-Cube[®] Boutique Illustration of available services

Security Aspects

● SaaS solutions are hosted at the provider. This results in reservations by the customer.

● **bi-Cube**[®] disarms these reservations with the following selection of Security Rules:

- The **bi-Cube**[®] core offers a high level of own security
- There are a variety of compliance settings
- Roles and authorizations are subject to an adequate Security Classification which cannot be assigned at the provider
- Admin functions are reportable
- Passwords are encrypted twice and cannot be decrypted by the provider

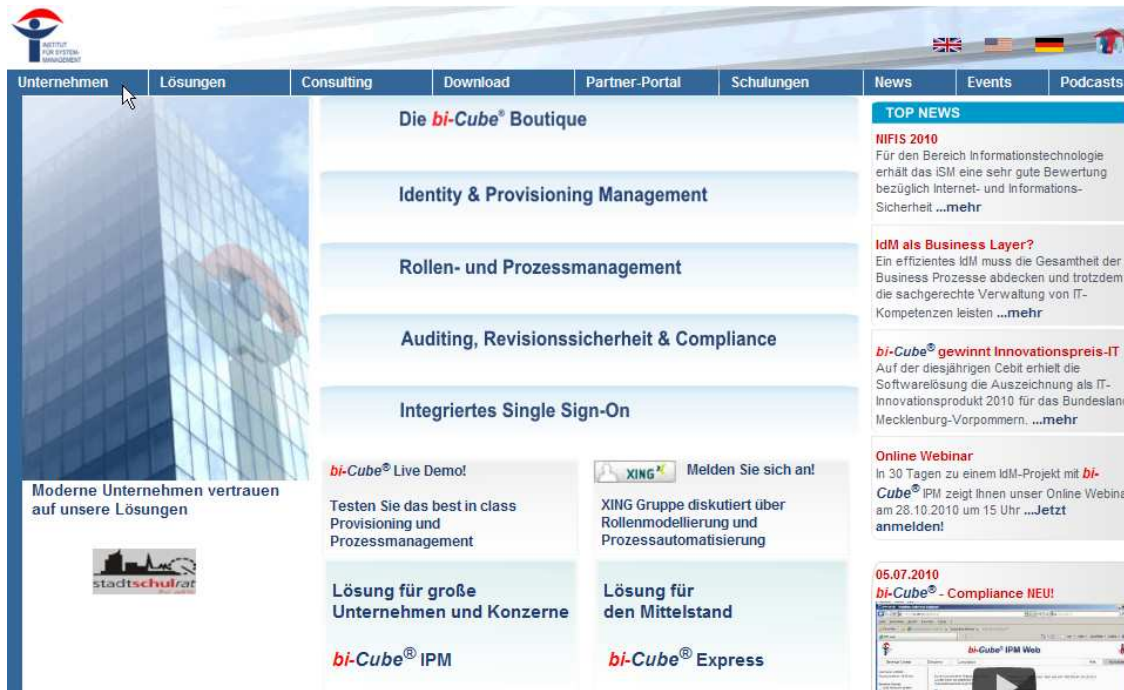

Security Aspects

With this SaaS solution the compliance of specified processes for the management of users and their authorizations is given with ***bi-Cube***[®].
